FOR IMMEDIATE RELEASE

Results are in from Tuesday's local election. Yes on 7A for Our Water, the ballot committee supporting the mill levy increase for the St. Vrain and Left Hand Water Conservancy District issued the following statement:

"We are thrilled that voters within the St. Vrain and Left Hand Conservancy District have chosen to protect clean water and healthy forests and rivers. This is an exciting outcome for our community and the District," said Jessie Olson, Executive Director of the Left Hand Watershed Center. "We have seen the impacts of a changing climate this year including drought and record-setting wildfires. We thank the voters and the many volunteers who helped make this possible and ensured that we can support our communities."

"This is a great example of our community stepping up to protect our communities and ensure we have water supplies for generations to come," said Eric Wallace co-founder and President of Left Hand Brewing. "The St. Vrain and Left Hand Water Conservancy District developed a 5-point Water Action plan that will protect rivers, forests and local water quality. Yes on 7A is great investment in clean water, which is absolutely essential for businesses like Left Hand Brewing, as well as for our community and the next generation."

With the support of local voters, the District will be able to implement this essential plan. By protecting the amount of water flowing in our rivers and creeks and improving the health of our forests that are critical to our drinking water sources, we can ensure the quality of water flowing into our water supplies.
